ARCHITECTURE IS A SYSTEM OF LINES WORKING IN HARMONY.

Linea is inspired by the essence of a line guiding proportion, defining direction, and shaping balanced spaces.

BALANCED PROPORTION

The 1 : 2 ratio creates a sense of balance and calm through elongated forms.

ELONGATED VISUAL EFFECT

The elongated 60x120 cm format creates a seamless vertical flow, enhancing the sense of height and spatial elegance.

ARCHITECTURAL CLARITY

A clean and structured design language, designed to integrate seamlessly into multiple architectural applications.

MODULAR 60X120 FORMAT

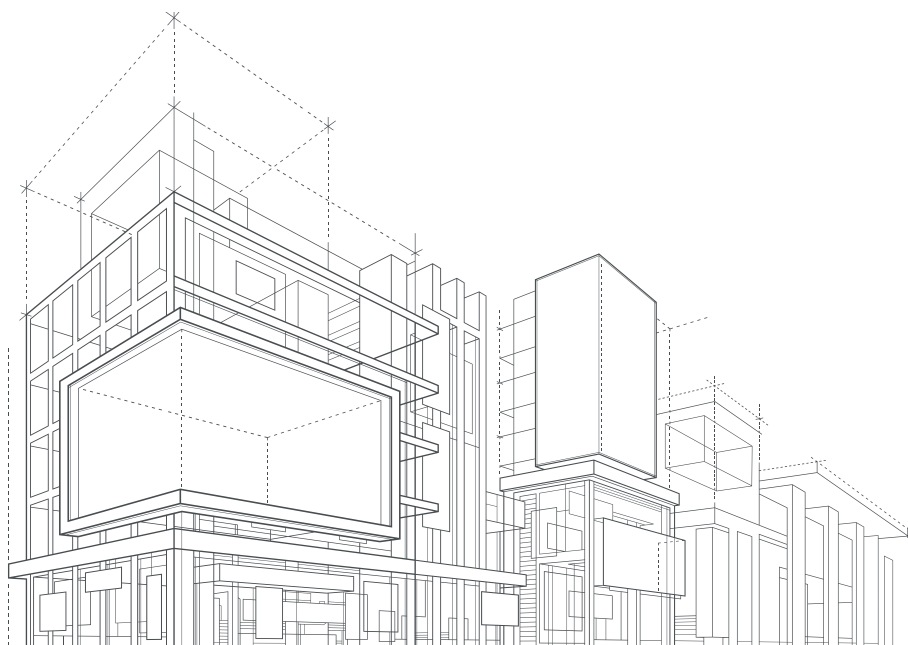

Designed for flexible application across walls, flooring systems, and modular architectural surfaces.

LIGHT MARBLE

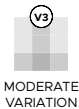

Refining veining with timeless elegance :

Optimized light base with refined, subtle veining patterns, enhancing surface continuity, reflectance, and a clean architectural aesthetic.

COLOR SHADE VARIATION GUIDE

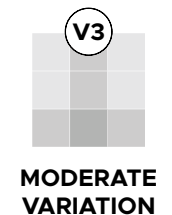

UNIFORM APPEARANCE

Minimal differences range of color & motif among tiles.

SLIGHT VARIATION

Slight differences in texture and/or pattern within similar colors.

MODERATE VARIATION

Clearly distinguishable differences in texture or pattern or colors from tile to tile.

SUBSTANTIAL VARIATION

Random color and/or pattern differences from tile to tile. Unique final installation looks.

PRODUCT CERTIFICATION

SNI ISO 13006-2018

R-RATING SLIP RESISTANCE

The R rating measures the slip resistance of flooring materials, especially in wet conditions, making it essential for areas like commercial spaces, bathrooms, and outdoor environments. R ratings range from R9 to R13, determined through a ramp test that evaluates the angle at which slipping occurs—the higher the rating, the better the grip.

CLASSING	INCLINE ANGLE	SLIP RESISTANCE	AREA OF USE
R9	6°-10°	Low	■ Suitable for dry indoor areas (living rooms and bedrooms). ■ Not recommended for areas that are frequently wet or exposed to water.
R10	10°-19°	Medium	■ Suitable for most indoor applications, including residential kitchens, hallways, and low traffic commercial spaces. ■ Can be used in areas that may occasionally get wet but not continuously exposed to water.
R11	19°-27°	High	■ Suitable for areas that may become wet, such as bathrooms, kitchens, and laundry rooms. ■ Often used in commercial kitchens or areas where water spillage is likely.
R12	27°-35°	Very High	■ Suitable for commercial spaces, industrial areas, and outdoor surfaces exposed to water, like swimming pool surrounds and outdoor terraces. ■ Provides excellent slip resistance even when the surface is wet or greasy.
R13	Over 35°	Maximum	■ Suitable for areas with a high risk of slipping, such as heavy duty industrial floors, ramps, and wet processing areas. ■ Often used in commercial or industrial settings where continuous water exposure is expected.

Abrasion Resistance	ISO 10545-7	Report abrasion class & cycle passed	Group III to V

- Color and other aesthetic features shown in this catalogue as close as the limitation of the printing process will allow.
- Some variations in color shade, finish and tolerance in bookmatched / endmatched design are inherent in granite products.
- Always view several samples before making final selection.
- Different may occur between samples and final product.
